Professional Experience

Senior Full Stack Engineer - (March 2013 to Date)
Company: **Berger Mobile**

- Coordination, management and development of all IT projects of the company using Agile methodology;
- Development of a full Mobile (Android, iOS) and PWA (Web) solution for finding professionals of all areas, and inserting your own services, with an integrated payment solution (PagSeguro) and geolocation. *This application used Ionic 3 with Angular 4 for the Frontend and Mobile platforms, and Firebase for the Backend (authentication, database, analytics and functions with NodeJS);*

- Full stack development of 3 native Android applications and 3 native iOS applications targeting the medical area and music and entertainment area. *The apps used Java for Android, Objective C, Swift 3.0, Push Notifications (Firebase), Content Provider (Android), Core Data (iOS) and followed the design guidelines recommended by Google and Apple;*
- Development of 2 full-stack web applications for product management, supplier's payment chain and financial reporting. *The applications used Spring Framework, Spring Rest (for Rest Services), Spring Data and MySql database, hosted on AWS. AngularJS, jQuery and Bootstrap 3 were used for front end development;*
- Invited to work as a full stack developer for Embrapa in the Conpress project, financed by World Bank. The main object of this project is to merge several different data and weather information from different sources, including data from Nasa, into a single area and database, to benefit farmers across the world. *This project used full J2EE and MySql for the backend and AngularJS and OpenLayers for the FrontEnd;*
- Full stack development of 4 hybrids applications for the commerce and events area, medical area and music and entertainment area. *Applications used hybrid frameworks such as Ionic and Sencha Touch and Cordova / Phonegap and Spring Boot, Spring Data, MySql and MongoDB for the backend;*
- Technical management of all cloud computing resources used by the company *(Amazon Web Services, Google Cloud, Firebase, Git).*

System Analyst – (March 2005 to March 2013)
    Company: **IBM**

- On Demand Workplace (ODW) project - worked on the development of the IBM Intranet portal on WebSphere Portal with estimated access to more than 200,000 people around the world;
- Worked on the worldwide translation project of IBM systems - involving several teams from different countries to coordinate and deploy localization in all parts of the system;
- Worked on accessibility projects - to adapt Web systems for people with disabilities;
- Worked on several projects related to the IBM Intranet, using J2EE technologies and DB2 database.

Full Developer – (January 2001 to March 2005)
Company: **Ibéria Informática**

- Complete development of FUNCESP Portal - to control and pay social security for all employees of the group;
- Worked on several J2EE and Portal projects, using J2EE and MVC standards, Portlet, Web Services, JMS, clustering and queue integration management.

Language Proficiency
- English: Fluent
- Spanish: Basic
